

3/2010 – December 9, 2010

Dear Readers,

Welcome to the third and last issue of the InVision InSight newsletter in 2010.

Today, we want to bring you news and information about InVision Software. In particular we would like to share with you the news of this year's **success of InVision User Conference** in Germany, the **new InVision's executive board member**, a **partnership** with one of the leading IT suppliers in Poland **Sygnity**, a **case study** on **RAC**, one of the largest motoring organizations in the UK, and others.

For questions or ideas concerning our newsletter, please send an email to newsletter@invisionwfm.com.

Enjoy reading and accept our best wishes for a Merry Christmas and a Happy New Year!

Regards,
The Editorial Team of **InVision InSight**

Company News of InVision

InVision User Conference – A Major Success Again This Year!

This year's InVision User Conference proved to be the most successful yet. On the 26th and 27th of October, more than 80 InVision customers from Germany, Austria, Switzerland and the Netherlands gathered at the Krickenbeck Castle in the Nette Valley, near Duesseldorf in Germany. The get-together was an absolute "sell out". A wide range of seminars were held, giving InVision users the opportunity to find out all the latest news on InVision Enterprise WFM product development and to improve their practical skills in using the product set. During the event itself, InVision again encouraged users and InVision staff to actively share their experiences with one another. The networking dinner held on the 26th of October, was also highly entertaining. Two actors, dressed initially as security staff and afterwards as waiters, provoked confusion as well as having generated a lot of laughs among InVision's customers.

If you are an InVision customer and are interested in attending next year's User Conference in Germany and the UK, please let us know by email: info@invisionwfm.com.

InVision Software Expands Executive Board

InVision Software AG has appointed Mauro Marengo (38) a member of the executive board. Mauro Marengo has been Global Head of Professional Services at InVision since 2006. He will assume responsibility for InVision's international services business within the management board.

Case Studies

RAC: Roadside – Contact Centers

Reduction in planning effort, annual savings as well as full compliance with RAC's sophisticated scheduling rules and fairness guidelines achieved by using the module AutoScheduler

One of the main objectives of RAC for applying InVision Enterprise WFM was the reduction of understaffed and overstaffed shifts, i.e. the improvement of coverage and service level. Tests by RAC showed a 12% reduction of such shifts. This improvement has a direct effect on one of the RAC's main key performance indicators, the PAR (Patrol Attendance Ratio) which refers to the percentage of incidents attended by RAC's own patrols. With the optimized workforce management from InVision, RAC patrols are able to attend more incidents. Therefore, RAC has significantly reduced its third-party costs. Tests comparing the former schedules and the ones generated with InVision Enterprise WFM showed an improvement in coverage of 1.3% which translates into avoided outsourcing costs of approximately £1.3 million per year.
