

Dear Readers,

Welcome to the second issue of the InVision InSight newsletter in 2010.

Today, we again want to bring you news and information about InVision Software, our products and selected customer projects as well as upcoming events. For questions or ideas concerning our newsletter, please send an email to newsletter@invisionwfm.com.

Regards,
The Editorial Team of InVision InSight

Company News of InVision

Free Webinar Presented by InVision Software: Social Networking and the Contact Centre

InVision Software invited contact centre managers, operations executives as well as workforce and forecasting managers to attend the free webcast 'Social Networking and the Contact Centre'. The topics which were addressed within the one-hour presentation included an overview of social media and social networking, a review of the emerging channels and when they are expected to become essential to leading verticals such as financial services, telecommunication, retail and government. Moreover, the webinar dealt with the impact of social networking on contact centre operations and technology, best practices for forecasting & scheduling in a multi-channel contact centre. The panellists also showed how to do multi-activity scheduling in a multi-channel environment and identify ways to involve agents and improve their work/life balance in the era of social networking.

Review: Call Center Innovations Tour 2010 - an International Success

In its fourth year, the Call Center Innovations Tour (CCIT), an all-day event presenting the latest technologies of the call centre market, attracted about 300 visitors. Besides the three organisers ASC telecom AG, Attensity Group and InVision Software, the exhibiting companies were Amergy, Authensis, Crealog, Customer plus, IBR Service, Merced Systems, The Bee Company, T-Systems, TSS and Voxtron. After the CCIT already took place in Germany, Austria and Switzerland in 2009, this year there was an event in the United Kingdom for the first time as well.

Customers' Questions – InVision's Answers

Can employees submit periods of time when they are available to work?

Using the Infothek Interactive Schedule module, an employee can define on what days and at what times he is available to be scheduled. The planner will then only be able to schedule shifts for employees that fall into these defined availability periods. If an employee, due to day care reasons, can e.g. only work between 8am and 5pm on Monday to Friday and is only available until 3pm on a Wednesday because of a personal appointment, it is possible to submit this information and the planner will only be able to schedule shifts for this employee outside of these specified hours. If an employee is available at all times, there is no need to enter an availability period. The planner will simply schedule shifts for the employee that match the contractual constraints and minimum rest period.

Is it possible to display reports in the Adobe Reader application window instead of the user's internet browser window?

Yes. In organizations which, due to security reasons, do not wish reports to be displayed via the browser window, reports can now be displayed in the Adobe Reader Application window as well. It is now possible to change the setting 'Display PDF in Browser' within the Adobe Reader to determine in which window the report will be displayed. If 'Display PDF in Browser' is selected, reports will be displayed in the user's internet browser Window. If 'Display PDF in Browser' is not selected, reports automatically will be displayed in PDF application window.

Partner News

InVision Software Announces Implementation Partnership with Fujitsu

Fujitsu, a leading IT systems, services and products company, has signed an implementation partnership agreement with InVision Software. The partnership will enable retailers across Europe to benefit from market leading innovations with the support of fully managed systems integration and service delivery. "The priorities in the retail sector are to match the deployment of in-store employees with actual customer footfall and thus to improve customer service and to avoid over- and under-staffing as well. We are pleased that Fujitsu has selected InVision Enterprise WFM as an appropriate solution to meet these requirements", said Peter Bollenbeck, CEO of InVision Software.

Case Studies

Vivento Customer Services – Contact Centre

Improved Staff Satisfaction and Increased Productivity: Agent Scheduling with "Infothek Interactive Schedule"

To ensure the highest possible agent availability for customer requests, Vivento places great value on a flexible distribution of individual working hours. At the same time, the opportunity to choose one's working hours flexibly is one of the main factors that contribute to a high level of employee satisfaction. Hence, the staff's involvement in the process of staff scheduling is of great importance to Vivento. Faced with the decision which workforce management (WFM) system to choose, Vivento picked the InVision Enterprise WFM solution because, apart from its many features for a requirement-driven multiple-site staff scheduling process, its Infothek Interactive Schedule module enables employees to become involved in what shifts they are placed on. Now, the rate of employees' shift requests met is between 87% and 100%. At the same time, staff fluctuation has been reduced to less than 3%.
