

2/2009 - 1 July 2009

Dear Readers,

Welcome to the premier issue of the **InVision InSight** newsletter.

Each quarter, we will bring you news and information about InVision Software, our products and selected customer projects, as well as upcoming events.

Your opinion is very important to us. For questions or ideas concerning our newsletter, please send an email to newsletter@invisionwfm.com.

We particularly look forward to receiving your feedback on the section **Customers' questions – InVision's answers**.

Regards,
The Editorial Team of **InVision InSight**

Company News of InVision

Call Center Innovations Tour 2009: A huge success

The third year in series, ASC, InVision Software, Living-e and Sympalog, experts in service center technologies, extended the invitation to the „Call Center Innovations Tour“ in May 2009. This year, the tour stopped at Duisburg, Hanover and Ingolstadt in Germany, as well as in Vienna, Austria, and in Zurich, Switzerland. Further events in Europe are already planned for the second half-year of 2009.

Enhanced System Performance with JobProcessor

The new JobProcessor module increases system performance by allowing optimization processes to run in particular time slots or on free servers. Actions that use up a great deal of a computer's resources can be delegated to free servers within a specific time frame, using JobProcessor. That way, this new module lightens the load on both the InVision Enterprise Server and the InVision HTTP Server. This yields much higher software performance.

Customers' Questions – InVision's Answers

How do I prevent users from launching simultaneous lottery or assignment procedures?

To prevent users from launching simultaneous lottery and assignment procedures select setting 48414 – and enter 1 in the system value field. The default value for this field is 1 which allows one user to submit more than one lottery and assignment procedure at once, however in this case the procedures will be run one after another.

How do I see the total number of people absence within the shift center?

Setting 48141 – Displaying totals and subtotals for display parameter of the same activity enables the user display the totals for activities types like 'Absence' or 'Presence' in the Activity and Activity overview worksheets in the parameter window of the Shift Center. Enter 1 to display the totals. Once the totals are being displayed you can specify the configuration you would like to see for the totals using setting 48092 – Display of data in the day cells of the parameter window. If 0 is specified within this setting meaning that the totals will display the average value over a 24hr period then the average total displayed may be 0. In order to view the total of employee's absence for a specific time range within the day you need to expand the day cell then right click on the cell and select staffing from the context menu.
